FOR IMMEDIATE RELEASE

Vision Technologies, Inc. Novated GSA Connections II Contract

Glen Burnie, MD, April 8, 2013 - Vision Technologies, Inc. (Vision) is pleased to announce that GSA Connections II contract GS00Q12NSD0011 has been novated from Government Telecommunications, Inc. (GTI) to Vision effective January 29, 2013. The novation follows the acquisition of GTI by Vision in 2012.

Connections II gives federal government agencies access to everything needed to support the integration of telecommunications, networking, and network-centric applications at the LAN, building, campus, and enterprise levels. The contract provides a one-stop-shop for global-reaching telecommunications infrastructure products and services. With over \$1 Billion awarded under GSA Connections vehicles, novation provides Vision with another key contract within the federal market.

Vision's President and CEO John Shetrone stated, "This is a strategic acquisition designed to extend our federal market presence. The Connections II contract leverages our entire portfolio of services, and provides the ability to service and support our existing and future client base throughout the federal marketplace."

Vision Technologies, Inc. is a professional IT services company headquartered in Glen Burnie, MD. Vision Technologies, Inc. employs over 300 IT professionals in 22 states, and provides a suite of solutions for commercial and federal environments. Service offerings range from professional services and on-site IT support to IP Convergence Technologies in Security and Audio Visual, to the design and installation of low-voltage voice and data cabling systems. Vision Technologies, Inc. is a successful prime contractor in the GSA VETS GWAC, GSA Schedule 70, and GSA Schedule 581 programs with over \$200 million in federal contract awards.
