

GSA Connections II Contract

Contract # GS00Q12NSD0011

Telecommunications Products, Services & Solutions

Connections II Contract Highlights

Connections II provides an easy-to-use GSA contract for all of your telecommunications, networking, and network-centric application needs at the LAN, building, and enterprise level – to all Federal Agencies.

Connections II offers:

- ▶ Commercial off-the-shelf (COTS), customized solutions, or a strategic combination of both
- ▶ 'Un-priced items' for labor, equipment, and technology not already priced in the contract
- ▶ Agencies determine their own requirements
- ▶ Global response is built in
- ▶ Agencies have complete control of all aspects of the project from the RFQ to payment
- ▶ Simplified competition process and extremely fast contract modifications

The Connections II contract is available for all Federal Agencies to modernize or enhance their telecommunications system infrastructures or capabilities with leading-edge, proven and dependable products and services including:

- ▶ Copper and fiber optic cabling
- ▶ Multi-functional inside/outside plant wiring
- ▶ Cable distribution systems
- ▶ PBXs, Key Systems, Switches, Routers, Modems, VOIP and Softswitches, etc.
- ▶ Infrastructure design and installation
- ▶ LAN hardware and software support
- ▶ Wireless, video, data systems, and support
- ▶ Engineering and design professional services
- ▶ Operations, Administration and Maintenance
- ▶ Telecom Expense Management

Why the Vision Team?

Vision Technologies, Inc. heads a dynamic alliance of leading technology partners in order to provide the most current technologies and products to our clients. The Vision Team is committed to providing the very best products, services and solutions at the most reasonable cost with positive past performance to back it up. Vision will collaborate with you to develop and provide superior products and services for voice, data and video applications, security requirements, and lifecycle support.

Vision offers nationwide and global coverage with a Partner Network consisting of over 500 partners in 22 states and on 3 continents who are expertly trained in various installations.

IT networking services, solutions and telecommunications is Vision's core business. Our team has installed and main-

tained thousands of systems and miles of cable and fiber worldwide.

Vision is both a Service-Disabled Veteran-Owned Small Business and a GSA Connections II small business prime contractor. We have worked with a strong team of world-class service providers, original equipment manufacturers (OEM), vendors and subcontractors. These partners include some of the best-known names in the business: Avaya, Fujitsu, Motorola, HP, Crestron, CommScope, Panduit, TE Connectivity, and others.

This dynamic team of companies offers our customers the experience, proven performance, commitment and expertise needed to meet critical agency mission needs in their information technology requirements.

Telecommunications Products, Services & Solutions

VISION AND GSA FAS — WORKING TOGETHER FOR YOU!

How to Start Using the Connections II Contract

First, a warranted Contracting Officer (CO) requests a Delegation of Procurement Authority (DPA) from GSA. The form is available online and takes approximately five minutes to fill out. GSA should issue a delegation confirmation within two business days. After receiving the confirmation, the CO becomes a Connections II Ordering Contracting Officer (OCO) and is able to issue task orders under Connections II. An OCO may issue orders directly to the contractors or use the assisted services offered by GSA regional representatives. Task orders may be for single or multiple sites as defined by the project. An agency may choose to have one or many OCOs.

Benefits of the Connections II Contract

- ▶ Agencies determine their own unique requirements
- ▶ Small Business set-asides are permitted
- ▶ One-stop shopping yielding substantial cost savings
- ▶ Nationwide and global support
- ▶ Fast, simple, and flexible with direct ordering
- ▶ Design standardization
- ▶ Flexible ordering and billing procedures
- ▶ Consolidation of multiple global tasks
- ▶ Performance-based contracting options
- ▶ Sustainable procurement options
- ▶ Mutually agreed project timelines
- ▶ Performance-based service delivery and business models
